The Transition Curve

Transitions (William Bridges)

“It isn’t the changes that do you in, it’s the transitions. Change is situational; new policy, new boss, new site. Transition is the psychological process people go through to come to terms with the new situation. Change is external; transition is internal”.

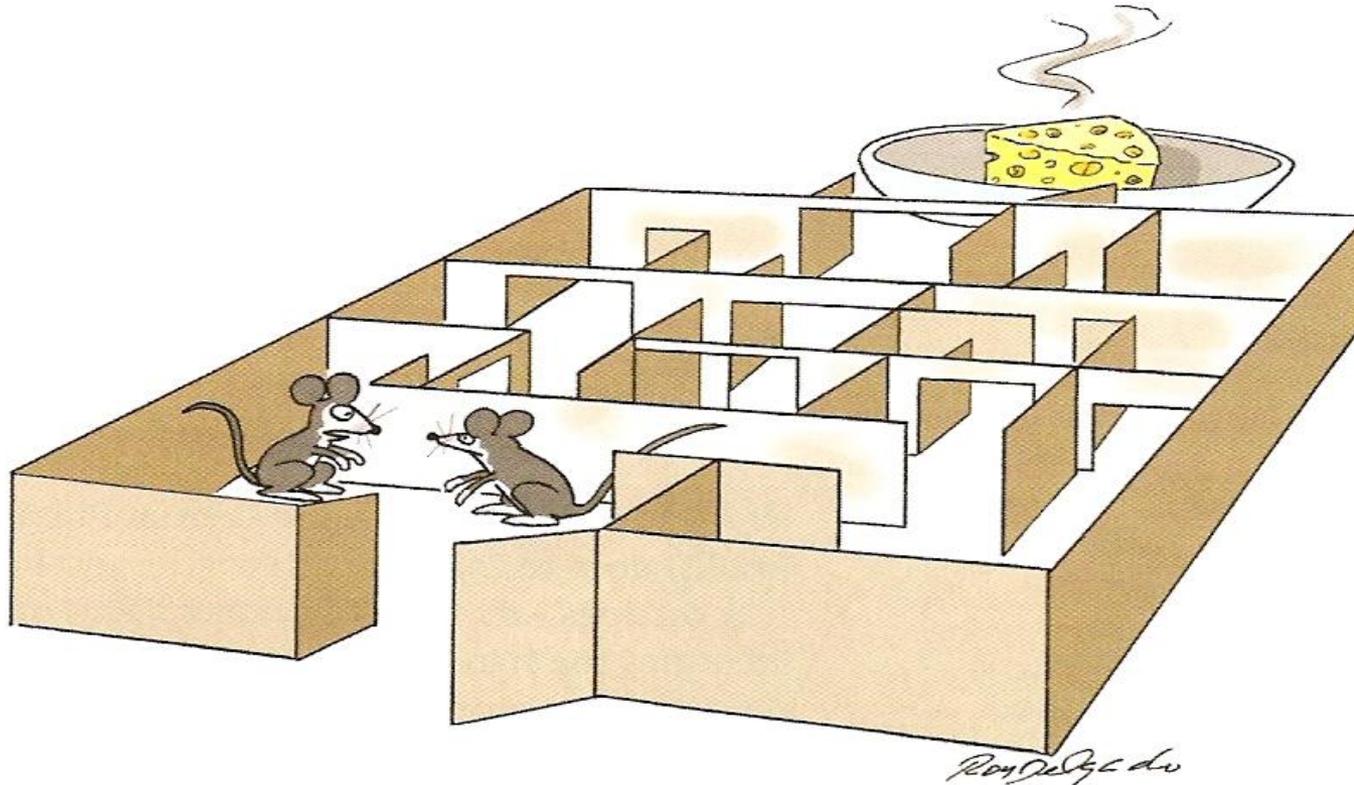

(William Bridges)

- Identify who's losing what
- Accept the reality of subjective losses
- Don't be surprised at over-reactions
- Accept signs of grieving
- Give people information – over and over again
- Mark the endings
- Treat the past with respect
- Get people to accept **problems**, not just the solutions
- Show how endings ensure continuity of what really matters
